BUCKEYE MATS

Our Products

Crane Mats

Used under crawler crane and large hydro machinery for bridges, trusses, crane and excavator support, barge deck protection and temporary bridging to provide ground stabilization.

- 12" thick from 16' to 40' in length
- Manufactured with either Mixed Hardwoods, Oak or Douglas Fir Timbers
- Exposed bolts and or cables for lifting
- Transition/Wedge mats
- Custom sizes available

Dragline Mats/Digging Mats

Used under hydro and dragline machinery, crawler cranes and most vehicles under 120,000 lbs

- 8" thick from 8' to 24' in length
- Manufactured with either Mixed Hardwoods, Oak or Douglas Fir Timbers
- Exposed bolts and or cables for lifting

Laminated/Swamp Mats

Used as a temporary road, ground stabilization platform and ground protection for vehicles under 100,000 lbs

- 2 or 3 ply laminated mat
- 4" or 6" thick
- 8' wide
- 12', 14' or 16' in length
- Nailed or Carriage bolted
- Cables or chains for lifting
- Made with mixed hardwoods, SYP or Fir
- Hybrid mats available

Pipeline Skids

- 4"x6"x4'
- Full sawn or Nominal
- Made from mixed hardwoods

Composite Mats

Used to create a strong and stable surface for electric transmission, oil and gas, construction and industrial industries

- Interlocking overlapping mat system
- 4.25"x8'x14'
- Made from high density polyethylene (HDPE)
- Improves traction for load bearing vehicles
- Significantly outperforms wood mats in endurance, mobility and environmental protection

Emtek Mats

- Engineered for superior ground protection with extremely heavy loads
- These mats have specific engineering data and calculations for psi, deflection, shear, modulus of elasticity and other critical values
- Much lighter than timber mats resulting in reduced freight costs
- 2.75", 3 1/2", 4 1/2", 5 1/2", 6 1/2" and 7 1/2" in thickness
- Available in 12', 16', 20' and 24'
